The **Inlet Pro™ Sediment Bag** helps keep storm sewer systems clear of sediment and debris.

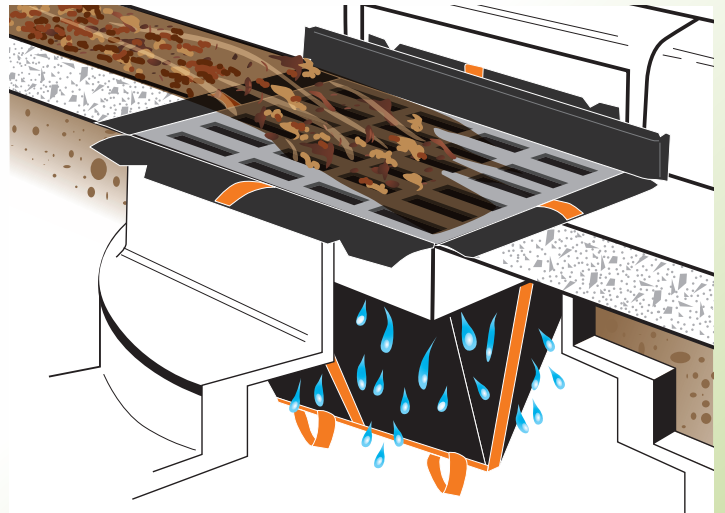

Inlet Pro™ bags are:

- Cost effective
- Easy to maintain
- Offered in different sizes and flow rates
- Reusable
- Required in many SWPPPs
- Available with foam/geotextile deflector for curb combination inlets

These durable, high-performance bags can be manufactured to fit nearly any standard stormwater inlet configuration.

Hanes Geo Components is the leading supplier of performance products for the construction industry and is committed to providing great service for the best geotextile, geogrid, silt fence and erosion & sediment control solutions available.
